DETAILED ACTION

Claims 1-43 are pending in the case.

Election/Restrictions

Claims 1-38 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 1/12/04.

This application contains claims 1-38 drawn to an invention nonelected with traverse in the amendment filed 1/12/04. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 112

Claim 39 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants have argued that the claim as amended "is not directed to identifying a subject having an increased susceptibility for developing hypertension by identifying any mutant Cyp4A11 polypeptide or any mutated Cyp4A11 nucleic acid, but instead, amended claim 39 is directed to identifying a subject having an increased susceptibility for developing hypertension by identifying a mutant Cyp4A11 polypeptide or a mutated Cyp4A11 nucleic acid and associating the mutant Cyp4A11 polypeptide or mutated Cyp4A11 nucleic acid with an increased susceptibility for developing hypertension" (page 10 of the amendment). However, it is maintained that even with this amendment to the claim, the issues remain the same, i.e. applicant has not provided an adequate written disclosure of the claimed invention. The skilled artisan cannot envision the detailed chemical structure of the encompassed genus of mutants which would result in the claimed function, i.e. increased susceptibility for developing hypertension, and therefore conception is not achieved until reduction to practice has occurred, regardless of the complexity or simplicity of the method of isolation or identification. Adequate written description requires more than a mere statement that it is part of the invention and reference to a potential method of isolating it. The compound itself is required. Applicants arguments that one may can perform a method of associated a mutant Cyp4A11 sequence with an increased susceptibility for developing hypertension, does not meet the requirements for adequate description of the invention as claimed. The mere statement in the specification that one can carry out the step of "associating a mutant Cyp4A11 sequence with an increased susceptibility for developing hypertension"

expresses a wish that such mutants may be isolated, rather than an adequate description of such mutants. Therefore, the rejection is maintained.

Conclusion

Claims 40-43 are allowed. Claim 39 is rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
